Other terms & conditions

1. The supplier shall execute an agreement with the purchaser as per tender conditions (agreement format is given in the tender document).

2. The supplier shall submit performance security amounting to 5.00% of the value of the supply order.
3. The labour & comprehensive charges of equipment after the completion of warranty period is finalized by KMSCL as mentioned above.
4. Since discount rate is not applicable for equipment under Running Contract of KMSCL, purchase/supply order can be issued directly to supplier at the given rate with tax & other charges (exclusive of KMSCL service charges).
5. If purchase/supply order is issued directly to the supplier, KMSCL service charge need not be paid. But the copy of the said order may be forwarded to KMSCL for information.

Technical Specification

Equipment :Airway Management Trainer(AMT)-for Adult

1. The Airway Management Trainer (AMT) should be able to demonstrate the following procedures
 - a. Tracheal intubation (oral and nasal)
 - b. Pharyngeal intubation (oral and nasal)
 - c. Esophageal intubation
 - d. Bronchial (available with optional bronchial tree)
2. The AMT must be able to provide realistic and complete training in all intubation procedures tracheal-oral and nasal and the use of the Laryngeal Mask Airway and Combitube.
3. The AMT must provide realistic anatomy of the airway.
4. The AMT must provide realistic head positioning. Neck flexion and extension, head lift, and jaw moveability.
5. The AMT must provide realistic checking for proper tube placement with a visual inspection of lung expansion during ventilation, and auscultation of breathing sounds.
6. A separate model for demonstration airway anatomy shall be provided.
7. The AMT must establish and maintain an open airway by head tilt, chin lift, neck lift, and jaw thrust.
8. The AMT should permit realistic practice in lung ventilation, also with the use of non-invasive equipment.
9. The AMT will come complete with a sturdy carrying case, directions for use, sanitation kit, lubrication spray, laryngoscope with blades of appropriate size and face masks

Note: L1 will be declared individually for Airway Management Trainer (AMT) - Adult, Child, Infant & Neonate

Equipment :Airway Management Trainer(AMT)-for Child

1. The Airway Management Trainer (AMT) should be able to demonstrate following procedures
 - a. Tracheal intubation (oral and nasal)
 - b. Pharyngeal intubation (oral and nasal)
 - c. Esophageal intubation
 - d. Bronchial (available with optional bronchial tree)
2. The AMT must be able to provide realistic and complete training in all intubation procedures tracheal-oral and nasal and the use of the Laryngeal Mask Airway and Combitube.
3. The AMT must provide realistic anatomy of the airway.
4. The AMT must provide realistic head positioning. Neck flexion and extension, head lift, and jaw moveability.
5. The AMT must provide realistic checking for proper tube placement with a visual inspection of lung expansion during ventilation, and auscultation of breathing sounds.
6. A separate model for demonstration airway anatomy shall be provided.
7. The AMT must establish and maintain an open airway by head tilt, chin lift, neck lift and jaw thrust.
8. The AMT should permit realistic practice in lung ventilation, also with the use of non-invasive equipment.
9. The AMT will come complete with a sturdy carrying case, directions for use, sanitation kit, lubrication spray, laryngoscope with blades of appropriate size and face masks

Note: L1 will be declared individually for Airway Management Trainer (AMT) - Adult, Child, Infant & Neonate

Equipment :Airway Management Trainer(AMT)-for Infant

1. The Airway Management Trainer (AMT) should be able to demonstrate following procedures
 - a. Tracheal intubation (oral and nasal)
 - b. Pharyngeal intubation (oral and nasal)
 - c. Esophageal intubation
 - d. Bronchial (available with optional bronchial tree)
2. The AMT must be able to provide realistic and complete training in all intubation procedures tracheal-oral and nasal and the use of the Laryngeal Mask Airway and Combitube.
3. The AMT must provide realistic anatomy of the airway.
4. The AMT must provide realistic head positioning. Neck flexion and extension, head lift and jaw moveability.
5. The AMT must provide realistic checking for proper tube placement with visual inspection of lung expansion during ventilation, and auscultation of breathing sounds.
6. A separate model for demonstration airway anatomy shall be provided.
7. The AMT must establish and maintain an open airway by head tilt, chin lift, neck lift and jaw thrust.
8. The AMT should permit realistic practice in lung ventilation, also with the use of non-invasive equipment.
9. The AMT will come complete with a sturdy carrying case, directions for use, sanitation kit, lubrication spray, laryngoscope with blades of appropriate size and face masks

Note: L1 will be declared individually for Airway Management Trainer (AMT) - Adult, Child, Infant & Neonate

Equipment :Airway Management Trainer(AMT)-for Neonate

1. The Airway Management Trainer (AMT) should be able to demonstrate following procedures
 - a. Tracheal intubation (oral and nasal)
 - b. Pharyngeal intubation (oral and nasal)
 - c. Esophageal intubation
 - d. Bronchial (available with optional bronchial tree)
2. The AMT must be able to provide realistic and complete training in all intubation procedures tracheal-oral and nasal and the use of the Laryngeal Mask Airway and Combitube.
3. The AMT must provide realistic anatomy of the airway.
4. The AMT must provide realistic head positioning. Neck flexion and extension, head lift, and jaw moveability.
5. The AMT must provide realistic checking for proper tube placement with visual inspection of lung expansion during ventilation, and auscultation of breathing sounds.
