Technical Specification

Equipment :Intra Vascular Ultrasound (IVUS) Machine and Fractional Flow Reserve (FFR) capability

1. The system should be the most latest and state of ART
2. The system should provide facility to perform intravascular ultrasound, FFR and instantaneous flow reserve (Instant wave free ratio) in a single mobile platform
3. There should be facility for digital phased array IVUS at 20 Mhz and rotational IVUS of at least 40 Mhz
4. There should be facility for precise visualization of stent approximation and dissection with representation of blood flow in malapposed stents and dissection flaps
5. There should be facility for automated tissue characterization
6. There should be facility for peripheral IVUS
7. There should be facility for automated, real time, integration of IVUS and angiogram and should be compatible with the existing Cathlab equipments in the department with no additional cost
